

MUNEEB UR REHMAN

Senior AI Engineer

+92 330 4626926 | muneebjutt616@gmail.com | linkedin.com/in/muneebjutt00 | Lahore, Pakistan

PROFESSIONAL SUMMARY

Senior AI Engineer with 2.5+ years architecting production-grade multi-agent systems, RAG pipelines, and LLM orchestration for enterprise clients across healthcare, automotive, and e-commerce. Proven track record of deploying AI solutions processing millions of documents and supporting high-concurrency systems. Passionate about building reliable AI products and scalable generative AI architectures.

TECHNICAL SKILLS

AI / LLM Systems RAG Pipelines, LangChain, LangGraph, CrewAI, OpenAI API, GPT-4, Claude, Mistral, Gemini, Vector Embeddings, Pinecone, ChromaDB, FAISS, Prompt Engineering, Multi-Agent Systems, AI Agents, LlamaIndex, vLLM, Ollama, Azure OpenAI, Anthropic Claude, Retrieval-Augmented Generation, Semantic Search, Elevenlabs, Text-to-Speech, Speech-to-Text

Programming Languages Python

Backend Development FastAPI, REST APIs, Web Scraping (Selenium, Playwright)

Databases PostgreSQL, MySQL, ChromaDB, Pinecone

AI & Computer Vision OpenCV, YOLOv8, PaddleOCR, EasyOCR, Document Processing, Object Detection, Computer Vision, OCR, Image Recognition, Image Processing, Automated Inspection

Cloud & DevOps Docker, Kubernetes, AWS, Amazon Web Services, Amazon Bedrock, Amazon Textract, CI/CD, GitHub Actions, Git, Nginx, Serverless, Linux

Data & Automation Data Pipelines, ETL, Workflow Automation, n8n, Odoo, QuickBooks, ERP

PROFESSIONAL EXPERIENCE

Senior AI Engineer

Innovatix Technology Partners March 2025 – Present

Ships production AI: IDE-native agents, document intelligence, and research automation for enterprise customers.

- **CodeAuto – AI Coding Agent (VS Code Extension):** Autonomous extension with Kuzu graph context, ChromaDB retrieval, and multi-file editing plus prompt-driven project scaffolding.
- **OpenParser – Legal Document Intelligence SaaS:** Multi-tenant platform with PaddleOCR ingestion, Llama 3.2 on-prem reasoning, and Qdrant RAG for contracts and Q&A.
- **WebMiner Agents Backend – AI Web Research & Scraper API:** AI-driven web research/scraping via Playwright, with user-reviewed sessions and automation from goal to source.

Senior AI Engineer & Technical Lead

Techling Private Limited, Pakistan December 2023 – March 2025

Leading AI innovation initiatives and cross-functional engineering teams to deliver enterprise-scale intelligent automation solutions

- **RAG Systems & Vector Search:** Architected production RAG pipelines using LangChain, Pinecone, and ChromaDB, processing 1M+ documents with sub-200ms latency, achieving 92% retrieval accuracy and enabling context-aware AI applications
- **Multi-Agent & LLM Orchestration:** Engineered multi-agent workflows with CrewAI and LangGraph, automating document classification, content generation, and Q&A systems, achieving 92% accuracy on 10,000+ job listings and 35% improvement in recruitment matching
- **Computer Vision & OCR:** Implemented YOLOv8 and PaddleOCR solutions for vehicle damage detection and document extraction, achieving 92% detection accuracy and reducing manual inspection time by 75% for automotive clients
- **Conversational AI Platforms:** Developed multi-tenant chatbot platforms with OpenAI function calling and Elevenlabs voice integration, implementing secure JWT authentication and dynamic CORS middleware, serving enterprise clients with multi-language support
- **MLOps & Infrastructure:** Containerized deployments using Docker, Kubernetes, and AWS serverless (Lambda, S3, EC2), implementing automated CI/CD pipelines, reducing deployment time by 60% and enabling comprehensive monitoring with A/B testing

- **Intelligent Automation:** Delivered automation workflows including job scraping and ERP integrations, leveraging ML-powered forecasting and conversational AI, reducing manual processes by 50-80% across diverse industry applications

KEY AI PROJECTS

1. WebFrame Studio – AI Video Ad Generator

AI video ad platform that turns business names or URLs into TV-style ads. Uses GPT-4o-mini for ad scripts, gpt-image-1-mini for image generation, and TTS for voice-over. Integrates Playwright for website scraping and a procedural music engine with the Web Audio API. Includes a video editor with slideshow, Ken Burns effects, and QR code support.

2. CodeAuto – AI-Powered VS Code Coding Agent

VS Code extension enabling autonomous AI-assisted development with project-wide codebase understanding.

Features multi-file editing, prompt-driven project structure generation, graph-based code context using Kuzu, vector retrieval with ChromaDB, and advanced coding agents powered by Claude Opus and GPT Codex models.

3. GetXM AI Chatbot

Enterprise multi-tenant RAG chatbot platform. Features intelligent contact collection via OpenAI function calling, multi-language support (English/Danish), secure JWT authentication, and customizable client configurations.

4. DBAgent - Multi-Database LLM Query System

MCP server converting natural language to safe SQL queries. Built TypeScript-based system with 6-step LLM-driven pipeline supporting PostgreSQL and MySQL with intelligent schema analysis, Express.js web chatbot, and comprehensive test coverage.

5. Teach Track AI

AI-powered Learning Management System with multimodal intelligence. Features secure JWT authentication, voice/text chatbot, OCR-based content extraction, automated question generation, AI-driven grading, and personalized study paths.

6. Memo Analyzer Agent

Multi-agent Arabic memo extraction system with RAG Q&A. Features real-time streaming and resumable action-tracking workflows for document processing.

7. DeftGPT

Production microservice for multi-LLM chat platform. Containerized deployment with streaming capabilities and RAG integration using ChromaDB vector database.

8. Multi-Agent Newsletter Automation

Intelligent 3-agent workflow automating newsletter generation. Automated research, content generation, and HTML formatting with structured output validation and Gmail draft creation.

9. CHEX.AI Vehicle Inspection

AI-powered vehicle damage detection achieving 92% accuracy. Automated inspection processes using YOLOv8 and OCR for licence plate extraction, reducing manual inspection time by 75%.

10. SRN AI Platform – Agentic Recruitment Intelligence System

Intelligent job scraper achieving 92% classification accuracy. Processed 10,000+ listings with 35% improvement in recruitment matching through AI-powered categorisation.

LANGUAGES

English (Fluent), Urdu (Native)

EDUCATION

Bachelor of Science, Computer Science

Government College University Faisalabad | CGPA: 3.45/4.00 | Graduated 2024

PROFESSIONAL CERTIFICATIONS

- Machine Learning Specialization (DeepLearning.ai)
- Deep Learning Specialization (DeepLearning.ai)
- Prompt Engineering for Developers (DeepLearning.ai)
- AI for Everyone (Coursera)
